Professional Experience

OpenText

Software Engineer

Jan 2026 – Present

- Developing end-to-end Web UI workflows for the **Malware Scan** feature, integrating multiple antivirus engines (**Microsoft Defender**, **ClamAV**, **Symantec**) to secure virtual environment **backup** and **restore** operations.
- Contributed to UI architecture, API design, and end to end workflow development involving **scan engine configuration**, **scan policy creation** and **scan execution**.
- Mentoring and guiding new engineers in Web UI development, providing **technical direction** and conducting **code reviews** to ensure quality and adherence to standards.

Associate Software Engineer

Sept 2023 – Dec 2025

- Led end-to-end development of Web UI workflows for Restore integrations across **SAP HANA**, **VMware**, and **Documentum**.
- Integrated **SAP HANA Store Key-based authentication** into APIs and UI workflows.
- Built reusable UI components reducing development effort by **70%**.
- Enabled **Disk-only**, **Disk + Tape**, and **Point-in-Time Recovery** workflows in MFC UI.
- Re-architected **SAP HANA backup parameter** workflow for **cluster environments**.
- Resolved critical **STAT** defects through root cause analysis.

Micro Focus

Software Engineer Intern

Feb 2023 – Aug 2023

- Developed POC Web UI workflow for **Granular Recovery** in **Data Protector**.
- Extended production support to **Hyper-V** and **H3C CAS** hypervisors.
- Built modular Angular frontend with Jest unit testing.
- Integrated frontend with REST APIs for **VM disk mount/unmount** workflows.

Relevant Project

Portfolio Website — React, Node.js, Express

- Developed a responsive, reusable component-based UI for a personal portfolio using **React**, enhancing user experience and optimizing performance across devices.
- Built scalable backend services using **Node.js** to manage business logic, process API requests, and handle server-side operations efficiently.
- Developed RESTful APIs using **Express.js**, implementing efficient routing and request handling for seamless frontend-backend integration.
- Implemented basic data storage using **MongoDB**, including schema design and CRUD operations for efficient data handling.
- Implemented and configured secure **CORS** policies to enable controlled cross-origin communication between **React** frontend and **Node.js** backend.

Technical Skills

Languages: TypeScript, Java, C/C++, SQL, Python, Perl

Frontend: HTML, CSS, LESS

Frameworks: Angular, React, Spring Boot, Node.js, Express.js, Jest

Databases: PostgreSQL, MongoDB

DevOps: Docker, Kubernetes

Tools: VS Code, Postman, Swagger, Figma, Git, Visual Studio, Jupyter Notebook

Design & Architecture: System Design, UI/UX Design

Certifications

- Software Architecture & Design of Modern Large Scale Systems – Udemy, May 2026
- DESIGN RULES: Principles + Practices for Great UI Design – Udemy, Mar 2026
- Docker & Kubernetes: The Practical Guide [2025 Edition] – Udemy, Apr 2025
- Java Programming: Arrays, Lists, and Structured Data – Coursera, Dec 2022
- Java Programming: Solving Problems with Software – Coursera, Nov 2022
- Data Base Management System – NPTEL, Sept 2021

Education

BE – ECE, NITTE Meenakshi Institute of Technology

CGPA: 7.75/10 (2019 – 2023)
